Subject: RE: EPA participation in review of ATSDR Draft Toxicological Profile for PFAS

First I have heard about this.

In the past we have gotten notices through NCEA. This does have a putivet endocrine MOA not sure if that is covered?

Subject: FW: EPA participation in review of ATSDR Draft Toxicological Profile for PFAS

Dear EC,

As described in the message below from Tom Sinks, we have been asked to review and provide comments on the attached draft of ATSDR's Toxicological Profile for Perfluoroalkyls. Please distribute the document to reviewers in your organization and send comments to **Lynn Flowers by June 14** (we have negotiated a new deadline beyond the date in Tom's email). Lynn will consolidate ORD's comments and work with your reviewers if any issues arise that need to be reconciled.

To help you identify reviewers, note the following chapter headings:

- Relevance to Public Health
- Health Effects
- Toxicokinetics, Susceptible Populations, Biomarkers, Chemical Interactions
- Chemical and Physical Information
- Potential for Human Exposure
- Adequacy of the Database (includes data needs and ongoing studies)

If you have any questions, feel free to contact me or Lynn. Thanks for your assistance.
Fred

Subject: EPA participation in review of ATSDR Draft Toxicological Profile for PFAS

ATSDR has provided EPA a draft deliberative copy of their revised PFAS Toxicological Profile. They are seeking technical comments by June 14.

I'd appreciate it if you would distribute this to those in your organization who can review and provide comments. Please send a single set of comments from your organization to Lynn Flowers by COB 6/9 with a cc to Anand Mudambi and Lawrence Martin.

Tom
